OUR BENEFITS

Without wireless forklift mounted scanning ⊖	With wireless forklift mounted scanning ⊕
Poor user experience and safety issues- forklift drivers with handheld scanners dismount or lean from the vehicle to scan	Forklift operators can focus on driving, increasing efficiency andimproving workplace safety- no arms outside the forklift
Lost efficiency- awkward manual scanning costs valuable time	One-button cab-mounted scanning operation delivers frontline efficiency gains
Inconsistency- manual handheld scanning leaves room for human error	No manual scanning required, reducing the risk of human error
Increased maintenance- wired forklift mounted solutions require constant maintenance as wires get damaged by the forklift mechanism	Wireless mounting reduces downtime and maintenance costs caused by damaged wires
Handheld readers can be dropped and damaged	No more loose equipment means, no more losses due to dropped equipment

Simple and fast installation	Replacing data cables becomes a problem of the past	Improved workplace safety	More accurate and efficient	Cost effective	Reduced maintenance costs	Less downtime

"Thanks to Bout Solutions innovative technology combined with the unique functionality of our fixed scanners, we can offer great value to our customers.

BOUT Solutions

DO YOU TRUELY DESIRE TO ENHANCE SAFETY AND EFFICIENCY?

BOUT SOLUTIONS

With heavy forklift accidents occurring each year, safety is a major concern. One effective approach to address this, is by implementing safe systems. ScanSystems is one such system as it **eliminates the need for forklift drivers to extend their arms to scan pallets.**

How much time do you lose in pallet handling, due to defective or malfunctioning systems or improper data transfer? ScanSystems is obsolete of cables which means **no need for replacement of cables, notorious work breaks or data interruptions.**

Identifying the right systems that consistently save you time can be a challenge. What you need is a clear Return on Investment (ROI). To ensure that your investment pays off over time, **we provide you with comprehensive data that illustrates how much time ScanSystems can save you throughout its lifespan.** This information empowers you to make an informed decision.
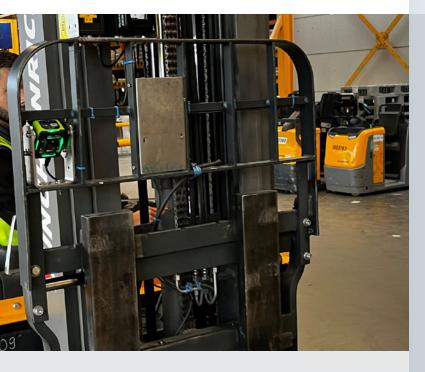

OUR SCANSYSTEMS

ScanSystems consists of a base connection box for two scanners and a trigger signal, a button box and an ultrasone sensor or photo sensor.
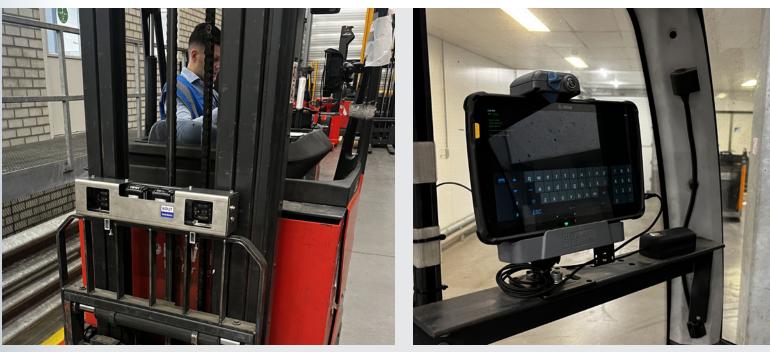

ScanSystems has been specifically designed for wholesalers, logistics service providers and transporters seeking to streamline operations, save time and create safer work environments. It reduces installation cost and maintenance together with high read performance of FS40 scanners by Zebra Technologies.

BENEFITS SCANSYSTEMS
- Is **instantly deployable** (no need for special software)
- Can be **easily installed** in max 4 hours
- Scans up to **two pallets simultaneously**
- **Filters out double codes** automatically

YOUR INSTALLATION

ScanSystems is available for a price from 4,000 euros and comes with a warranty of two years. We offer worldwide shipping. Once the order is placed, we start working for you directly. Delivery time depends on order size and stock.

Our team will guide the installation process, and should you have any questions or encounter any issues, we'll promptly send our experts to your location for assistance.

If you have any inquiries about our terms and conditions, please feel free to ask. We are here to provide you with the best service possible.

Get in touch with us, and we'll provide you with a complimentary ROI calculation.

ScanSystems reduces maintenance costs and downtime. Every time.
